

What are you doing this Dec. 25th?

Join **KIDS BUILDING THINGS** for a *family activity...with TOOLS!*

Taking Things Apart and Building Cardboard Box Forts

Take something old apart and build something new on your day off. We're offering 2 simultaneous workshops for all ages in the same room. Do both or pick one.

TAKING THINGS APART

Learn how every day small appliances, gizmos, and toys work by taking them apart with the guidance of our volunteer engineers. We provide the tools, safety gear, and someone else's unloved appliances. You get to explore. Ages 5+ with parent present.

BUILDING CARDBOARD BOX FORTS

Experience the joy of crawling into a refrigerator box and pretending it's a space shuttle, car, tent, castle, or more. Help us build a truly fantastic cardboard box fort for the younger (and older) kids to crawl through and play in. We'll provide a few starter boxes, tape, and coloring implements. Bring a new large clean cardboard box if you have one. Please no boxes from homes with cats. Ages 18 mo+ with parent present. Cutting of cardboard by adults only.

Taking Things Apart and Building Cardboard Box Forts

Wed. Dec. 25, 2013

1-4pm

Community Center of La Canada Flintridge

4469 Chevy Chase Dr

La Cañada Flintridge, CA 91011

(818) 790-4353

All ages. Age 16 and under admitted with parent.

\$5 per participant. Register @ <http://www.cclcf.org/> or pay cash at the door.

FOR MORE INFO check us out on the web or drop us an email:

KidsBuildingThingsProject@gmail.com

"Kids Building Things" is a volunteer initiative run by engineers, hobbyists, and teachers to teach kids and their parents in the LA and Pasadena area how to use tools, build things, and understand how things work. We like to think that we are building hands-on engineers and artists of the future. We partner with the Community Center of La Canada and the McGroarty Arts Center to bring about fun classes for kids and parents.
